Q: How do I avoid adding unicode white space when uploading files to a SharePoint List programmatically? I'm trying to upload a CSV to a File Element of a custom List in SharePoint, but every File Element it tries to add to the List ends up having unicode white space added as the element and appears to be completely broken when opened in Excel. So it just ends up as a string of some of the rows, like this: How should I avoid this? A: What I ended up doing is removing these white spaces and newlines. Here's how: foreach ($file in $files) { $row = $file.Stream.ReadLine() $row = $row.Trim() if ($row -ne "") { $listItem = $list.
